

RISHABH DIMRI

Software Engineer | Automation & Java Backend Developer | Pune, India
+91 8439856909 | rishu.dimri04@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | [Credly](#)

SUMMARY

Software Engineer with **1+ year of experience in enterprise automation and production support**, now focused on **Java backend development**. Built **Ledgerly**, a Dockerized **Spring Boot 3 REST API** with **JWT authentication and PostgreSQL**, deployed on **Render**.

TECHNICAL SKILLS

Languages: Java, Python, SQL

Backend: Spring Boot 3, Spring Security, Spring Data JPA, REST APIs, JDBC

Databases: PostgreSQL (Supabase), MySQL, Oracle SQL

API & Tools: JWT, OpenAPI, Swagger, Maven, Git, GitHub, Postman, Docker, Render

Core Concepts: Data Structures & Algorithms, OOP, SOLID Principles, Low-Level Design, DBMS

Others: Blue Prism(RPA), React.js, React Native

PROJECTS

Ledgerly – Personal Finance Platform

[Live Demo](#) | [Frontend](#) | [Backend](#)

Java, Spring Boot 3, Spring Security, Spring Data JPA, PostgreSQL, JWT, Maven

- Built a **Spring Boot 3 REST API with 17 endpoints** for auth, transactions, budgets, categories, and financial reporting.
- Implemented **JWT authentication with Spring Security**, including registration, login, **access/refresh tokens**, password management, and protected endpoints.
- Built the persistence layer with **Spring Data JPA** and **PostgreSQL**, covering CRUD operations, pagination, sorting, and financial analysis queries.
- Wrote **unit tests with Mockito** for the service layer, and added centralized exception handling and request validation.
- Containerized with Docker**, deployed on **Render**, and documented APIs with **OpenAPI 3.1** and **Swagger UI**.

Sanchari – Online Train Reservation System

[GitHub](#)

Java, JDBC, Oracle SQL

- Built **train scheduling, seat availability, and ticket booking workflows** using Oracle SQL with input validation.
- Added **administrative controls** for managing the reservation system.

PROFESSIONAL EXPERIENCE

Software Engineer, Capgemini

August 2025 – Present

Pune, Maharashtra, India

- Selected to transition from **CRM support** to **Blue Prism maintenance & development** based on technical performance.
- Maintain and enhance **20–30 enterprise Blue Prism processes** for Siemens, keeping production runs reliable.
- Resolved **100+ tickets** across CRM and Blue Prism operations, including **50+ maintenance tickets** covering code defects, bug fixes, and client change requests.
- Diagnosed process failures through **root-cause analysis and workflow debugging**, applying fixes that reduced recurring incidents and improved stability.
- Implemented client-requested changes while ensuring uninterrupted live operations..

React Native Developer Intern, QuadB Technologies

February 2025 – July 2025

Chandigarh, Punjab, India

- Developed **React Native features** for HeeBee Coffee and Sporrان (Kilt-based), integrating **REST APIs**.
- Fixed defects across **orders, basket, wallet, and authentication workflows** in HeeBee Coffee.
- Contributed to Sporrان's initial development, including **onboarding, account creation, Kilt-based authentication, and DID-based wallet functionality**.

EDUCATION

Noida Institute of Engineering & Technology

August 2021 – May 2025

Bachelor of Technology in Computer Science | CGPA: 9.2

CERTIFICATIONS

- [Claude Certified Associate – Foundations](#) | [AWS Academy Graduate – Cloud Foundations](#)
- [Google Cloud](#) – [Manage Kubernetes in Google Cloud](#) | [Store, Process, and Manage Data on Google Cloud](#)

ACHIEVEMENTS & LEADERSHIP

- Solved **1,095+ DSA problems** in Java and Python on [HackerRank](#) and [LeetCode](#).
- Hackathon Team Lead (Jun 2023–Apr 2024)**: Led teams to multiple wins across healthcare, sustainability, and AR/VR, including **IIMT Mind Installers Hackathon 2.0**.
